EXCELLENCE

Our assembly facility is equipped with advanced technologies and specialised tools, ensuring precision and quality in the manufacture of luxury safes. Expert craftsmen meticulously work on every detail to meet the highest standards of security and elegance. The controlled environment and strict quality measures ensure exceptional products combining functionality with sophisticated design.

At Arcas Ollé, every safe is the result of meticulous craftsmanship combined with cutting-edge technology. We use only the highest-quality raw materials, and every component is designed, developed and manufactured in accordance with the most demanding international standards. The result is a range of products that reflects excellence, security and distinction.

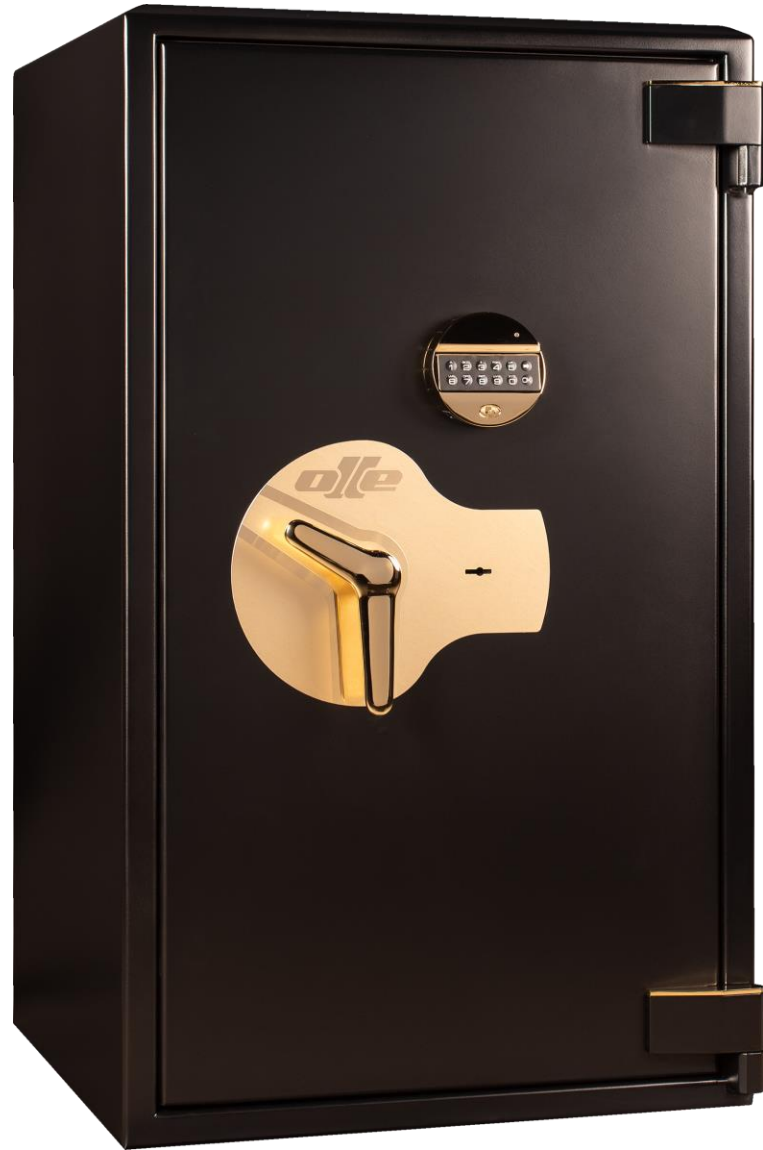

The Ilux range offers a wide variety of dimensions and security levels, with certifications covering Classes II, III, IV and V according to the UNE EN 1143-1 standard. Its structure combines high-strength materials and latest-generation armour, optimised to provide the highest level of security with minimal wall thickness and exceptional overall lightness.
